

Chandrashekhar Kachawa

Full stack developer building real products that people actually use.
I work with React, Next.js, Node.js, and TypeScript to create e-commerce platforms and web applications that perform well and look sharp

Work Experience

Backend Internship | Advika Innovate | August 2025 - Present

- Developed and maintained RESTful APIs using Node.js and Express.js to support new application features.
- Designed and managed database schemas with PostgreSQL.
- Implemented new features and API endpoints for a production application, ensuring secure data handling.
- Testing with Jest and Postman.

Full Stack Developer | PixelSaffron | November 2024 - July 2025

- Collaborated with a team of developers, designers, and project managers to deliver high-quality freelance web projects.
- Managed and contributed to the full project lifecycle for 3+ client websites, from initial concept to final deployment.
- Developed responsive websites using technologies such as React.js, Tailwind CSS, and Shadcn.
- Integrated third-party APIs and payment gateways (e.g., Razorpay) to enable secure transactions and streamline the checkout process.

PROJECT EXPERIENCE

Discord Webhook Manager

- Built a full-stack application using Next.js, React, and TypeScript to simplify Discord server management.
- Engineered a centralized dashboard for managing announcements, avatars, and message templates.
- Implemented a real-time preview and intuitive message composer for seamless user experience.
- Designed and developed a scalable platform with TanStack Query, Radix UI, and Tailwind CSS.
- Solved a key problem for community managers by providing a cost-effective alternative to paid bot subscriptions.

Ctrix Chat App

- Developed a real-time chat application using React.js and Chakra UI for a modern, responsive interface.
- Implemented Firebase for user authentication and to enable instant, real-time messaging.
- Engineered key features, including direct messaging, group chat functionality, and rich media support for GIFs.
- First personal project created in 2021

StoneSU – via PixelSaffron

- Built Backend with Express JS, MongoDB,
- Integrated Razorpay payment gateway with secure transaction processing,
- Implemented role-based authentication system protected routes, and middleware for admin/user access control
- Developed admin dashboard with CRUD operations for inventory management, real-time order tracking, and analytics with proper data validation and security measures

Gujarat, India

Skills Technical Skills

- Next JS
- React
- Golang
- Typescript
- Express JS
- GraphQL

Tools/Software

- VS Code
- Linux
- Bruno
- GitHub

Achievements

- 1st Position in Java Programming Competition
- 2nd Position in Presentation Activity
- 3rd Position in Typing Competition

Educational Background

BCA Aryan College 2022 - 2025

Certification/Short Courses

- Javascript Data Structure and Algorithm
- Responsive Web Design
- Next.js - Codevolution
